Plumbing Work

1. Installing, repairing and maintaining, domestic, commercial or Industrial plumbing system
2. Interprets blueprints and building specification to map layout for pipes, drainage systems and other plumbing materials
3. Installs pipes and fixtures, such as sinks and toilets, for water, gas, steam, air, or other liquids
4. Fitting domestic appliance
5. Pipe connections and fixtures
6. Tests plumbing systems for leaks and other problems
7. Analyses problem and identifies appropriate tools and materials for repair

A right plumber make all the differences because we make sure all the plumbing trouble disappear....

A bad wire can cause a fire....A faulty wire can start a flare...An overload power can be dire...A naked wire can cause unwanted desire

So, always go for accredited certified electrician to ensure electrical safety because it will save your live and your property.

"HAVE NO FEAR, YOUR CERTIFIED TECHNICIAN IS HERE"
